Pendulum Thinking

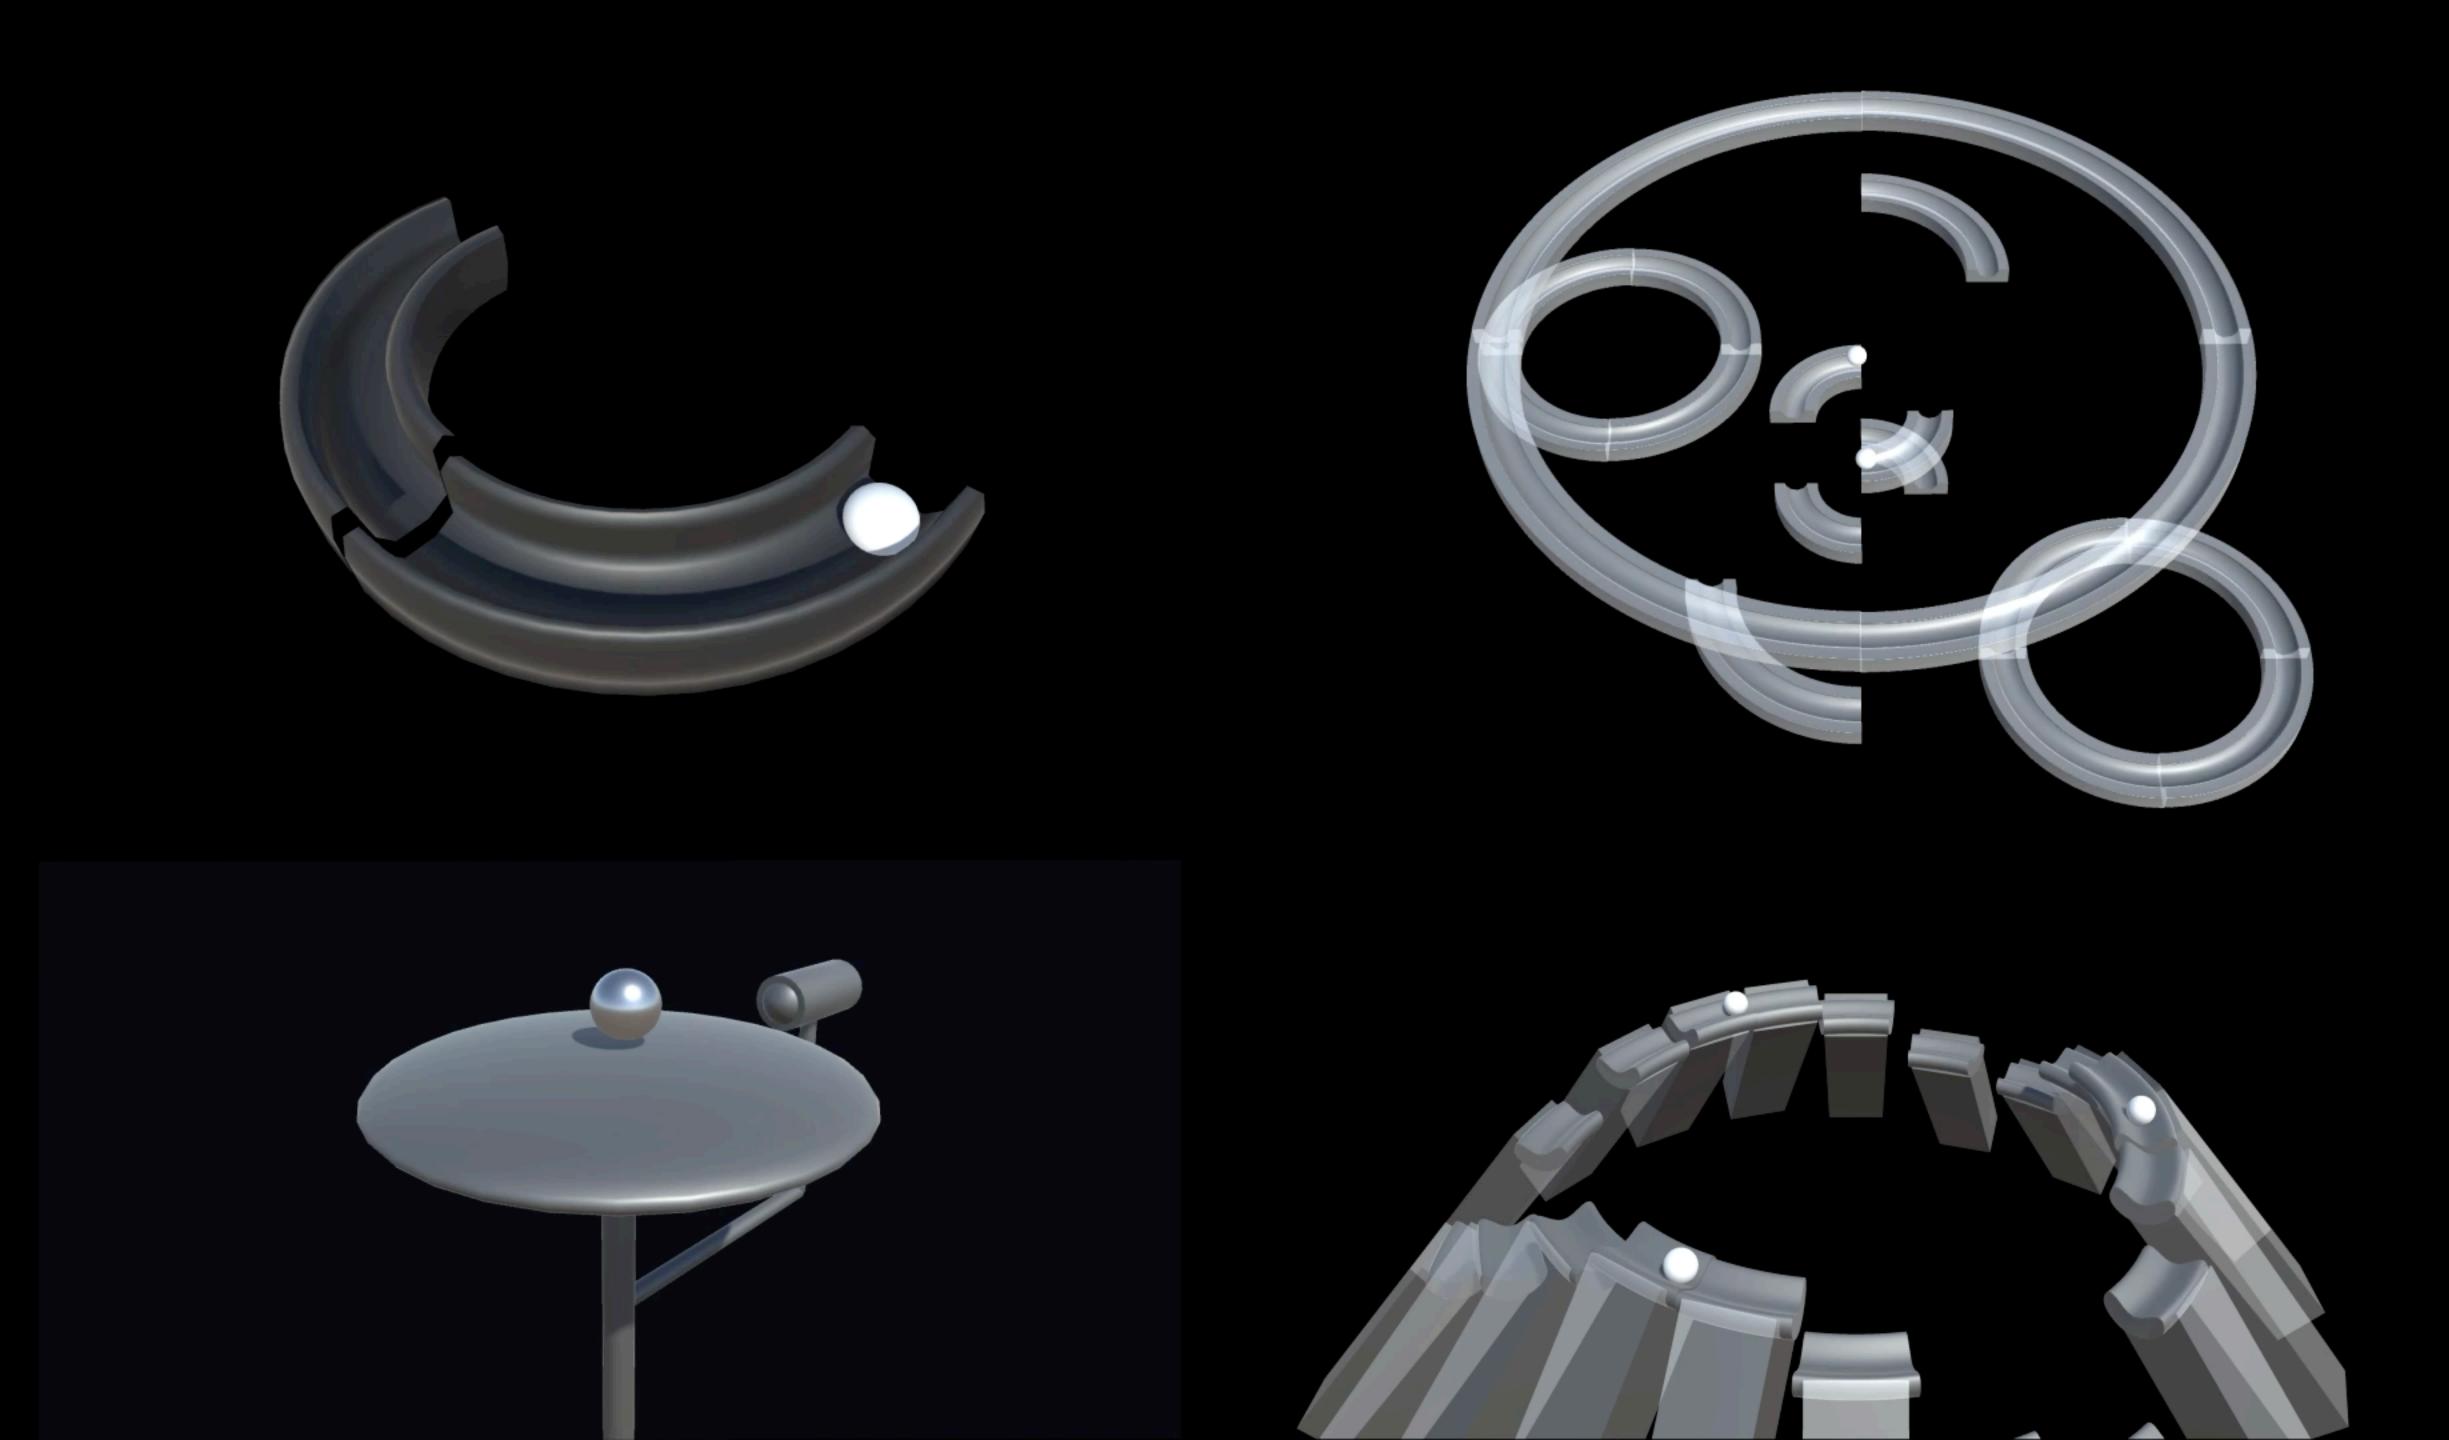

Moving back and forth between different perspectives — to understand multi-faceted issues, overcome fragmentation, and approach creative discovery. Making and thinking, abstract and concrete, subjective and objective, digital and physical, logic and aesthetics. These are some of the many perspectives we take at Takram. We see ourselves as a pendulum, swinging between and across different disciplines and ideas, exploring new fields.

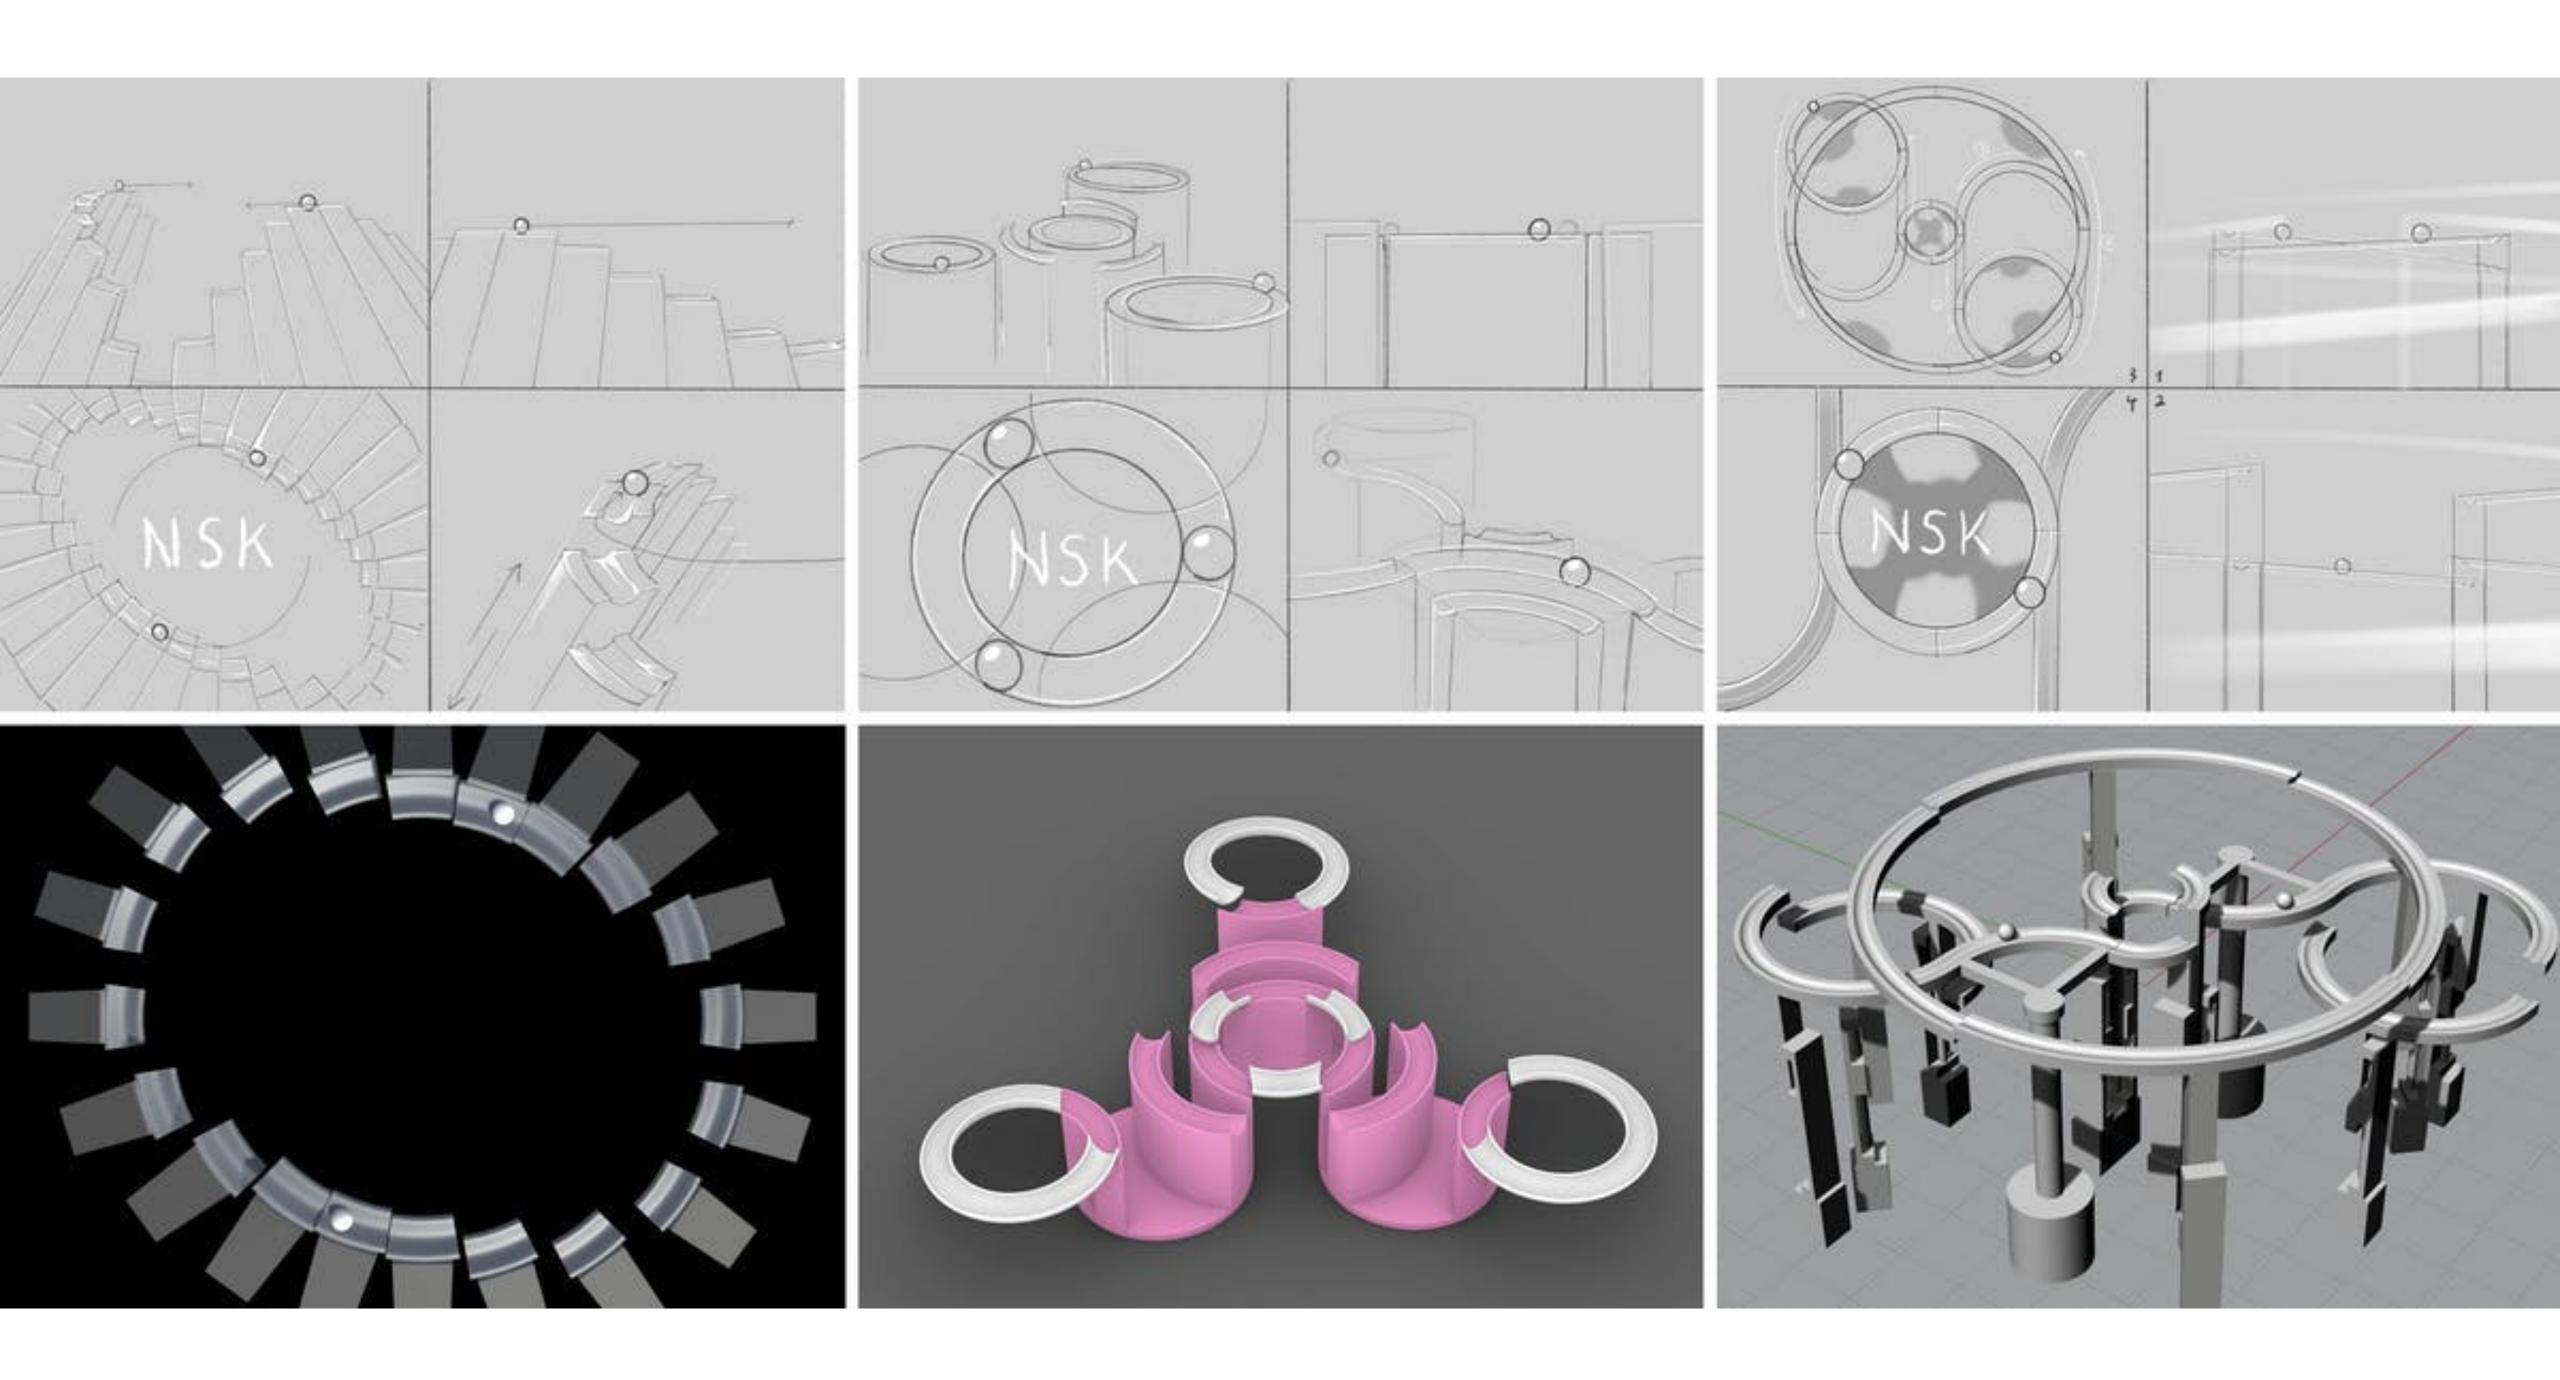

Pendulum Thinking

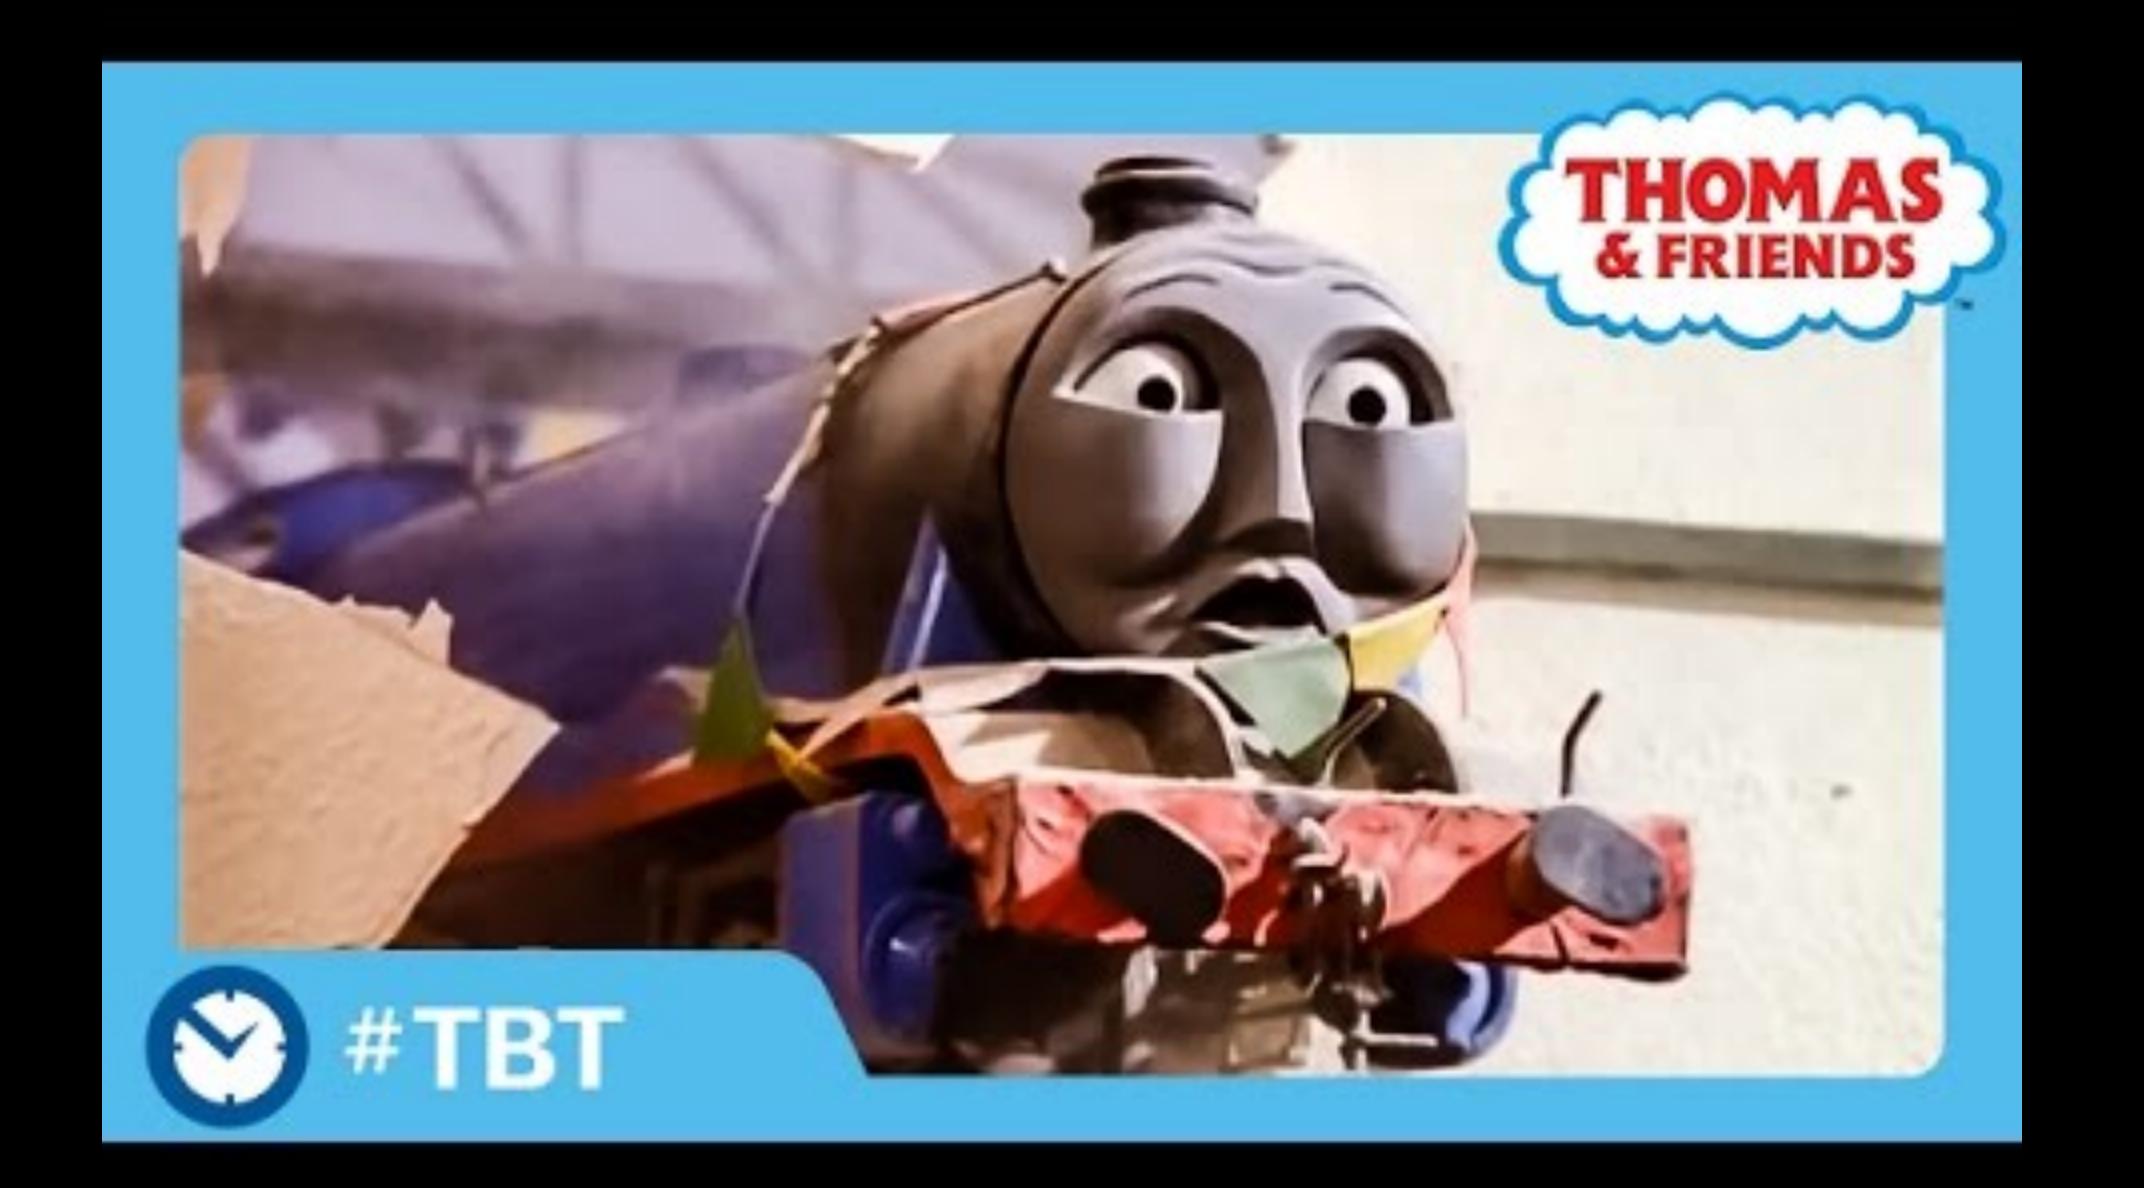

https://films-tv-shows-and-wildlife.fandom.com/wiki/Accidents_Will_Happen_(song)

Fear of failure is one of the strongest frictions of the design and creative mind.

We have regular internal events where people share their experiences of failure in projects while listening to 'Accidents will happen'.

What is the most powerful tool to overcome fear?
