Work selection 2022

01 This talk is not about

Moore's Law
Design and AI opportunities
Transitions

02 Why hybrid designers

The digital era
Science - Technology - Design (Gui Bonsiepe)
Core principles of digital objects
A computerized world

03 How to become a hybrid designer

Change in materials, skills and tools
The subjective experience

04 From music to gene expressions

Hidden gestures in data
Body | sound | gene expressions

The digital era

- Current time period in which **digital technology plays a significant role in daily life** and in the functioning of society
- Widespread **adoption of computers and the internet**
- **Personal computers** in the 1970s and 1980s

Science - Technology - Design

- Science is the **production of knowledge** and it supports the production of **cognitive innovation**
- Technology supports the **production of instrumental innovation**, it consists of the production of **know-how**
- Design activity is neither the production of knowledge nor the production of know-how, but the **articulation of the interface between artifact and user**

Core principles of digital objects

- Numerical representation
- Modularity
- Automation
- Variability
- Transcoding

Hybrid-designers

- **Deep understanding** of what computers can and cannot do
- Creating **abstract models of the world** to be tested through computational exploration
- Computers are **powered by our decisions**

Ivan Sutherland

Sketchpad 1963

Change in materials, skills and tools

Production materials

- Data
- Models
- Algorithms
- Anything virtual | XR tech
- Minds and computers

Skills

- Procedural thinking
- Data wrangling and analytics
- Network science
- Computer simulation

Tools

- No code tools
- AI tools

The subjective experience

- **Personal perception and interpretation** of one's environment and **sensations**
- Cultural background, and **cognitive processes**
- Starting point for **understanding the nature of reality and the self**

centro.

FROM MUSIC TO GENE EXPRESSIONS

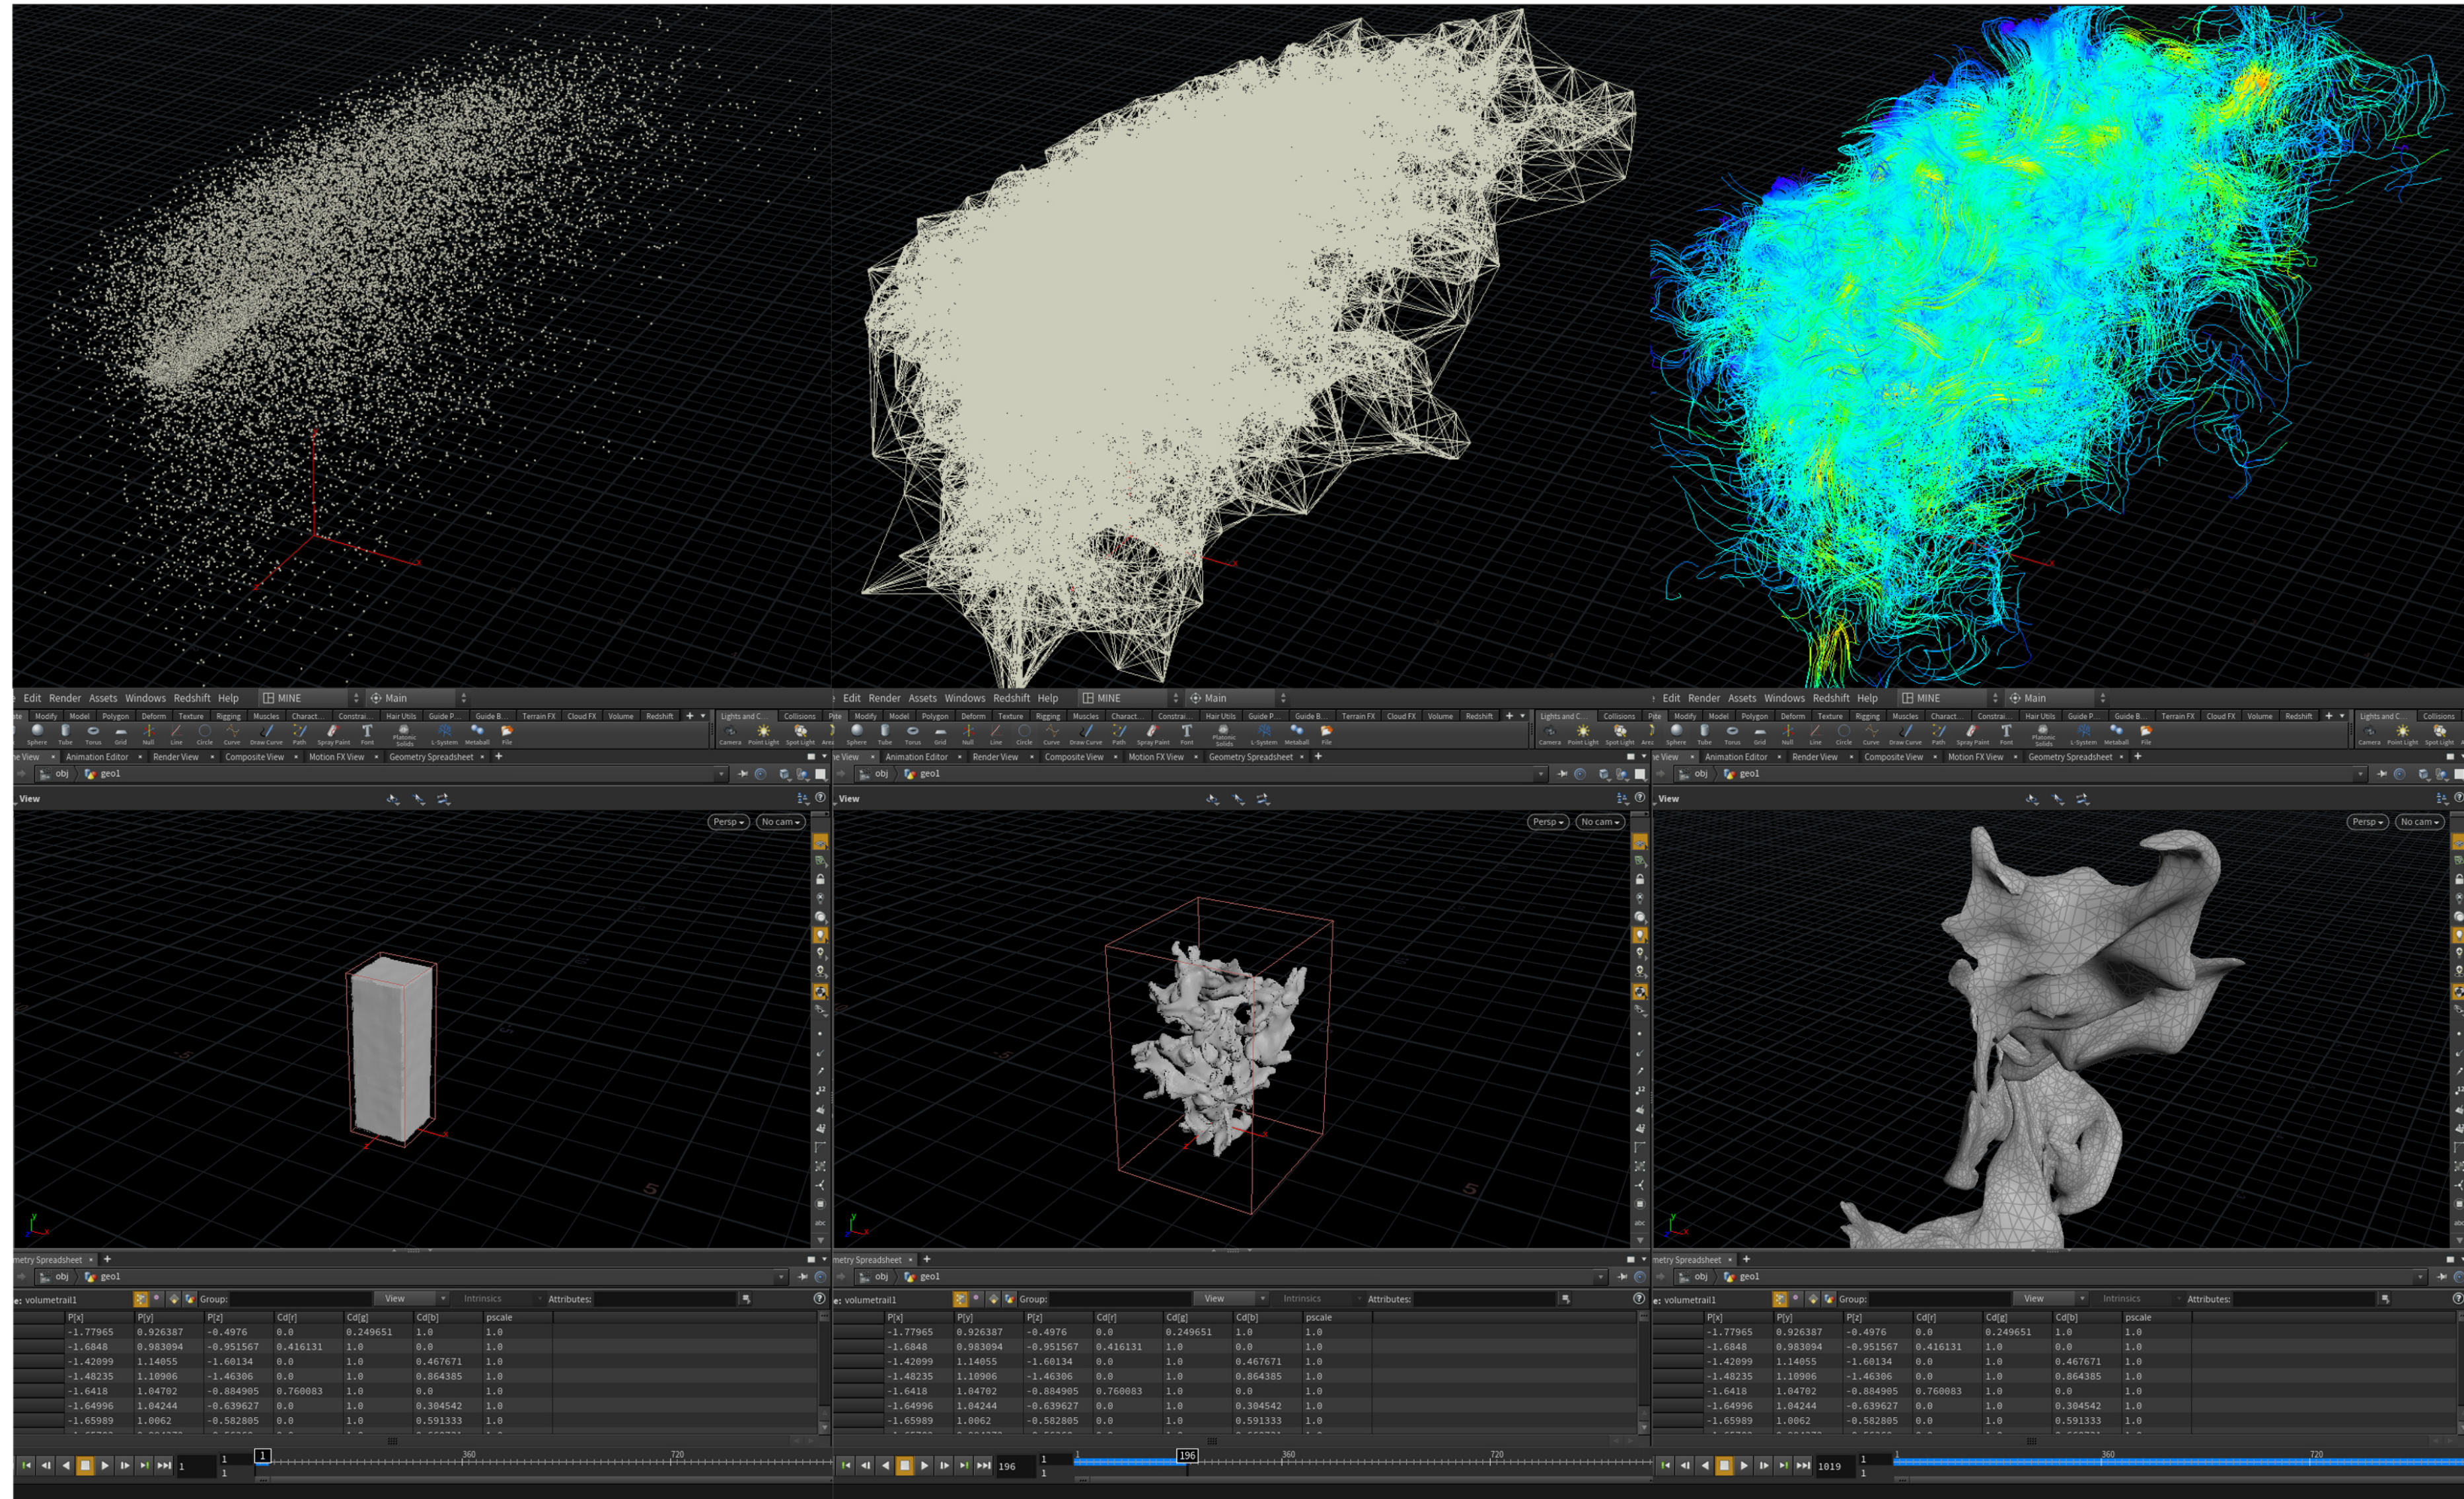

Data exploration

centro.

FROM MUSIC TO GENE EXPRESSIONS

centro.

FROM MUSIC TO GENE EXPRESSIONS

Body | Motion capture

Gestures in data

t-SNE Iterations: 1000 perplexity: 2

t-SNE Iterations: 5000 perplexity: 50

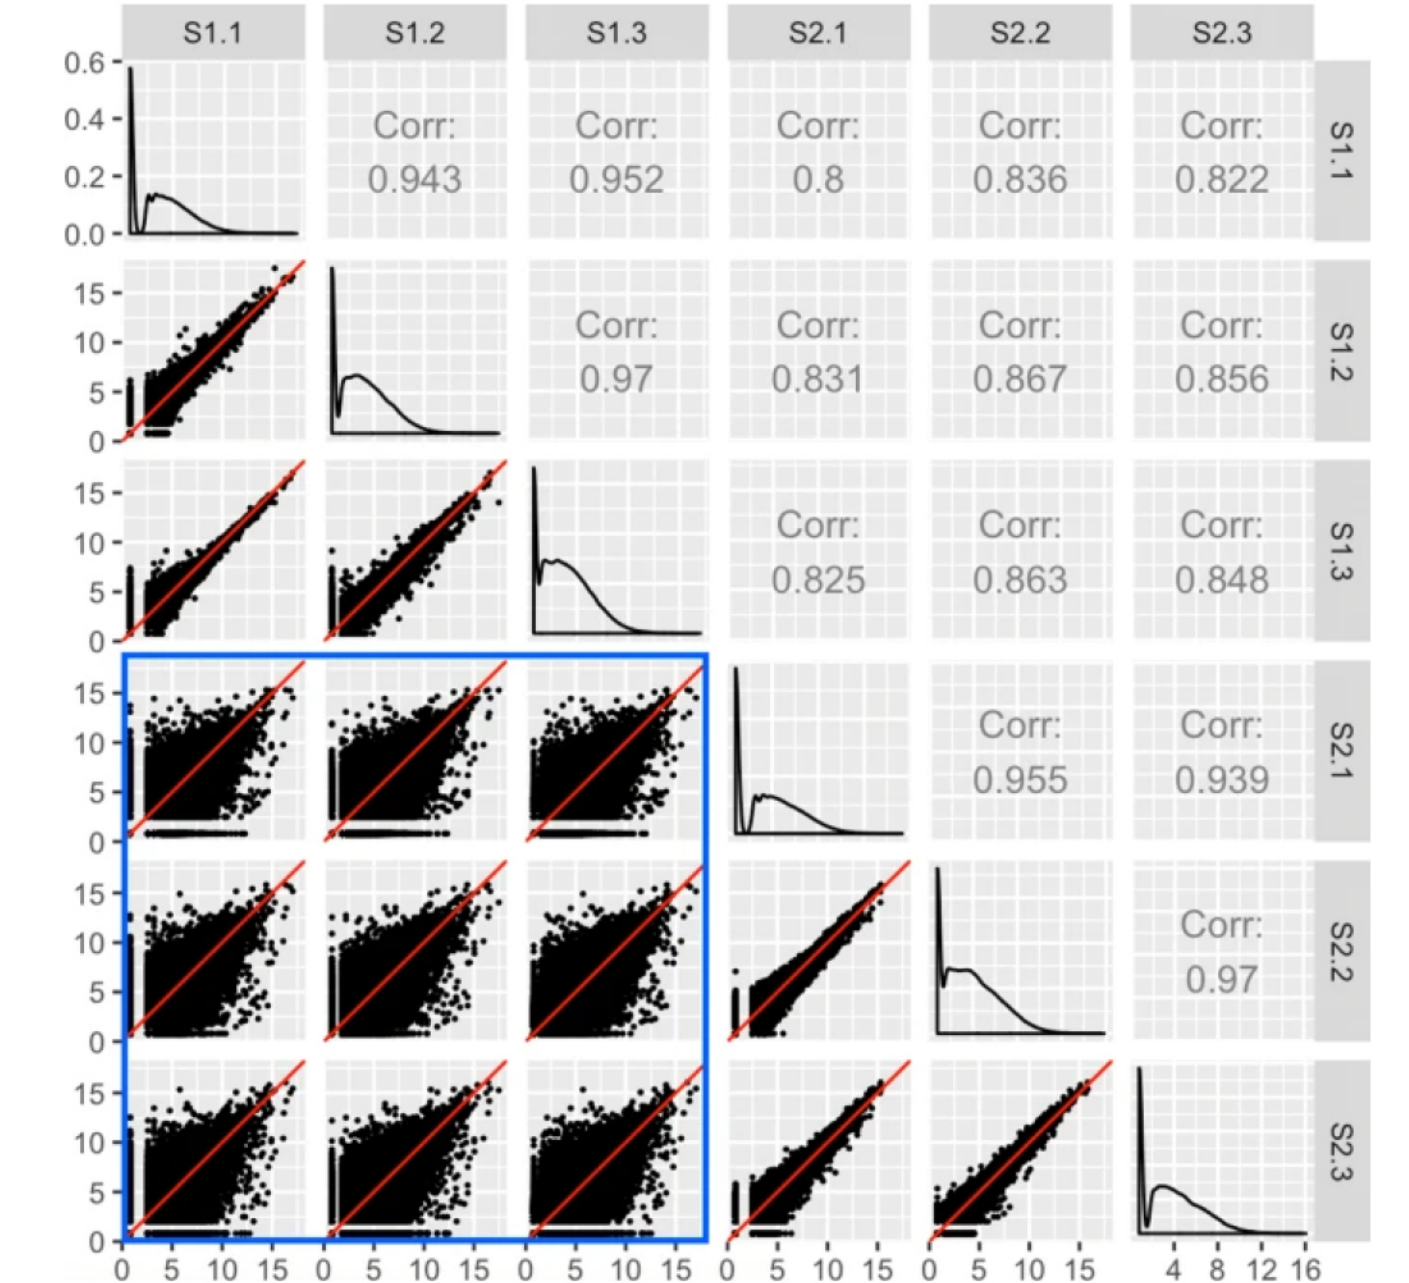

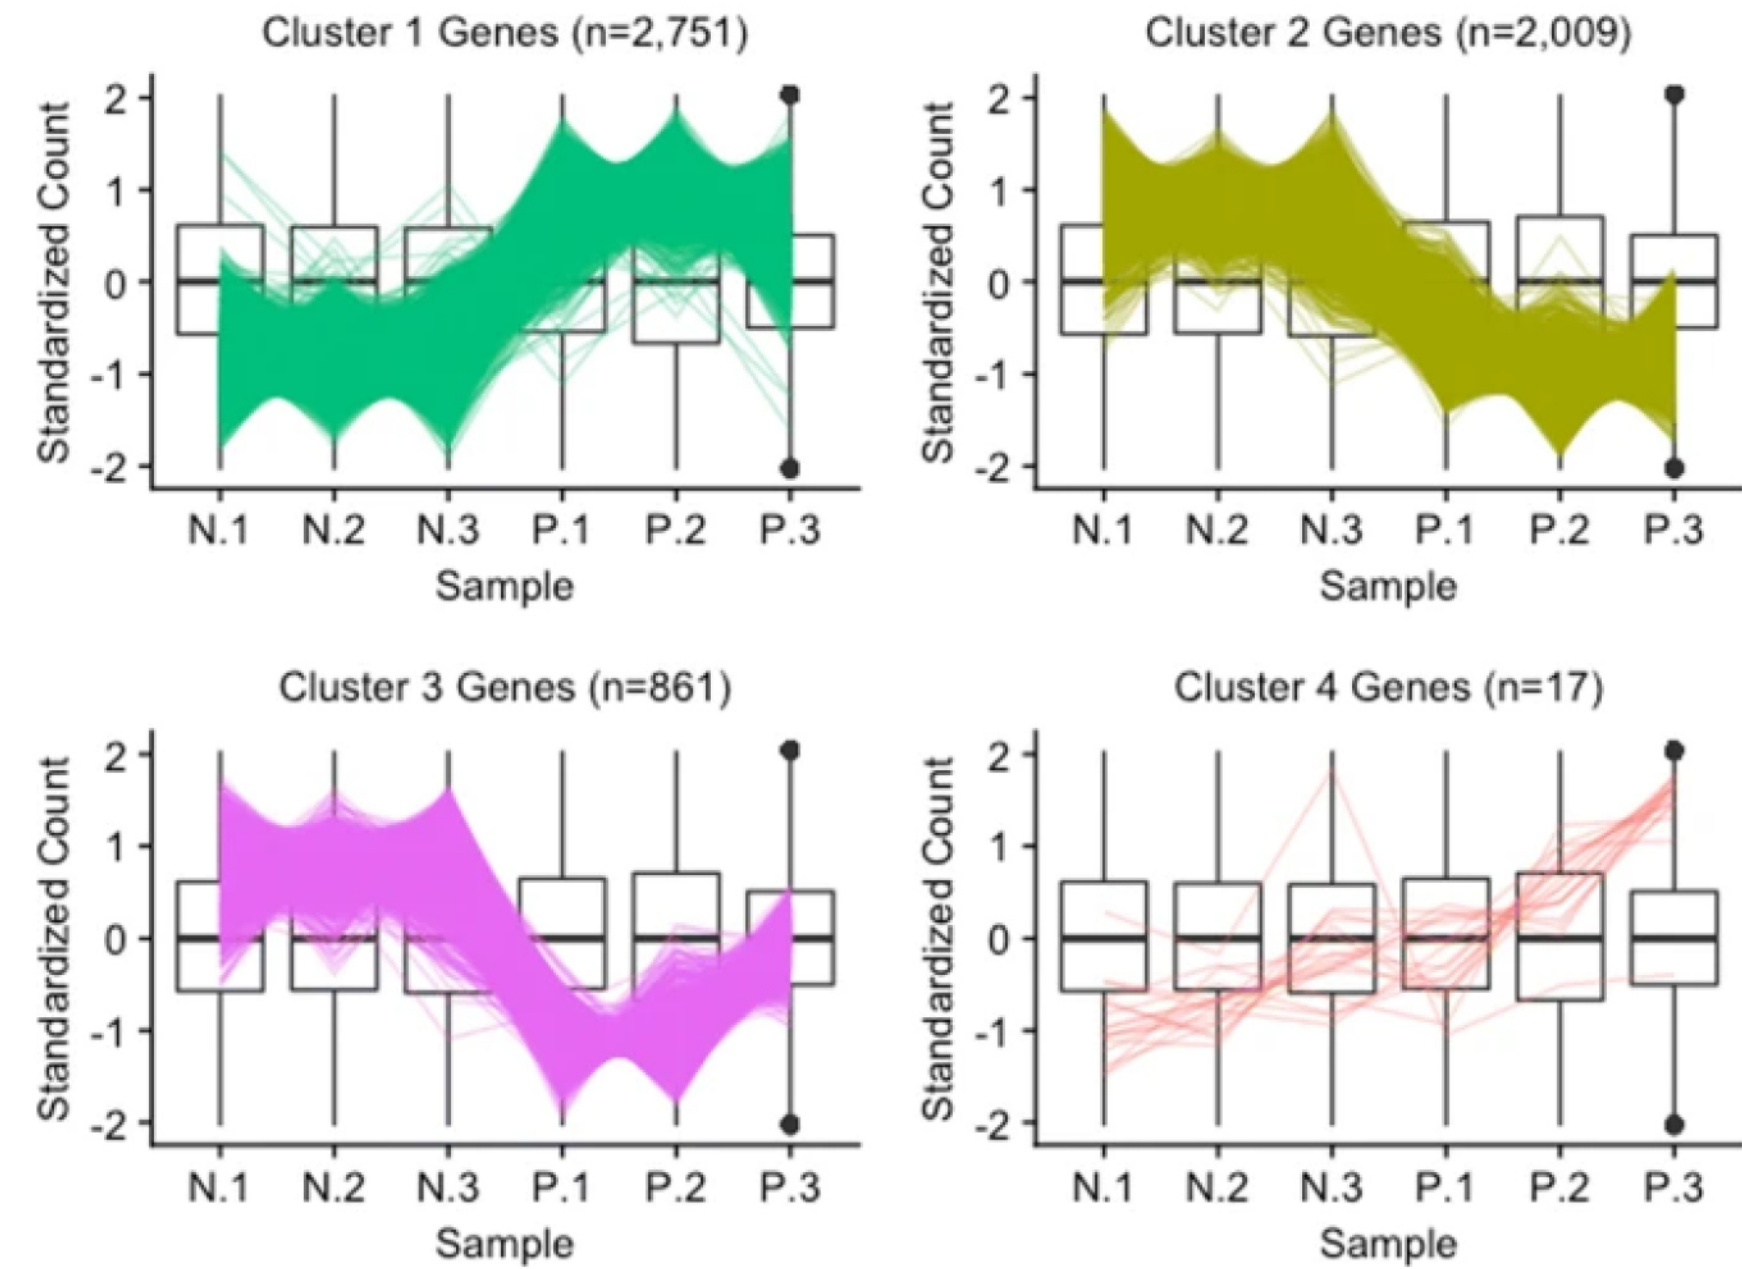

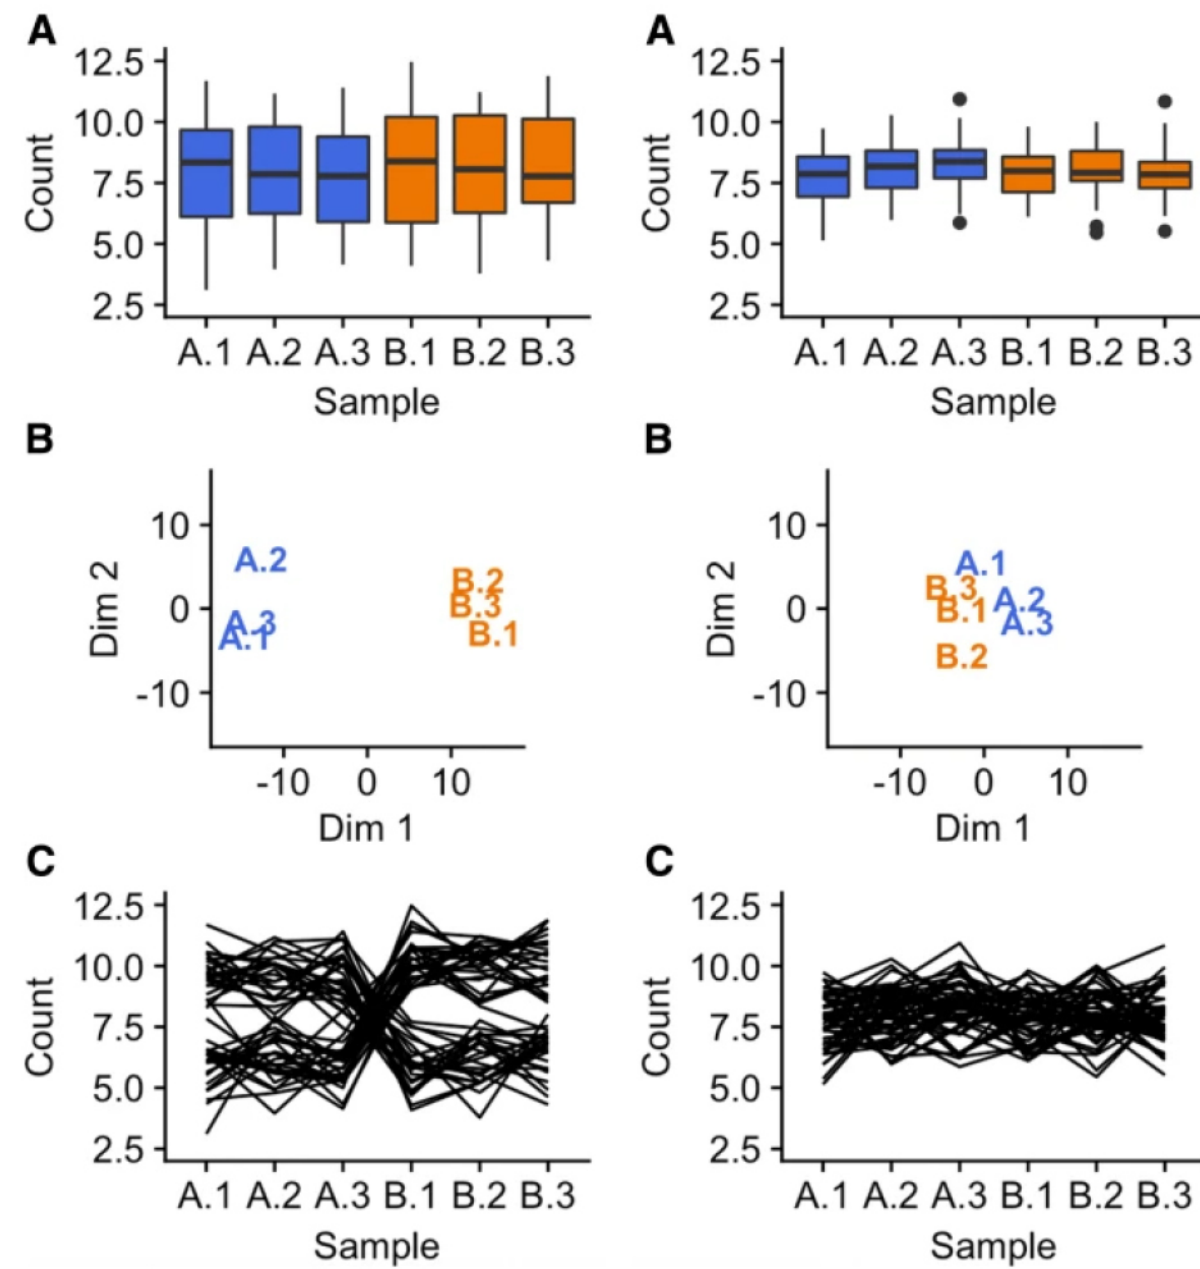

centro.

FROM MUSIC TO GENE EXPRESSIONS

Differential expression analysis

centro.

**Visualization for
gene expression dynamics
in single cells**

centro.

I dream of hybrids: the last move

(The unimaginable)

Mexico | 2023
