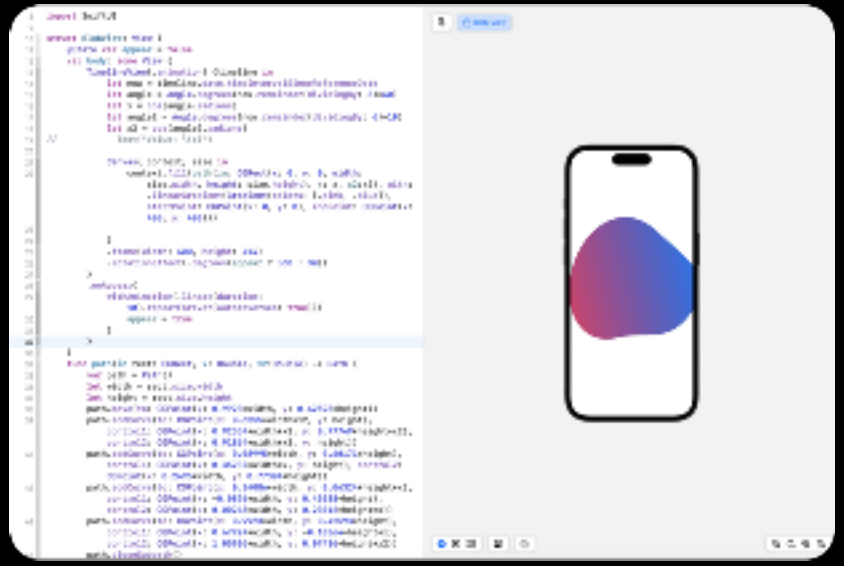
Hurdle 1, How to get a new shape everyday?

Problem:

User's need to get a new custom shape everyday. Do I have canvas draw me a shape? Or do I draw the shapes?



Change the CGPoints for each shape?

```
var dayOfTheYear: Int { Calendar.current.ordinality(of: .day, in: .year, for: Date()) ?? 1 }
var shapeName = "shape\(dayOfTheYear)"
```

Create 366 shapes and assign them to a specific day using variables
